- (a) Financial Counterparty's unrealized loss is settled by the Company in real time by adjusting the Free Margin on the Financial Counterparty's Account;
 - (b) The Financial Counterparty's unrealized profit will be settled if the unrealized profit on all currently opened Positions exceeds EUR 500.000. If at the end of the day the unrealized profit exceeds EUR 500.000 then the Company will roll over the Financial Counterparty's Open Positions by closing all the Financial Counterparty's Positions, transfer the unrealized profit on the Financial Counterparty's Account and reopen of the closed Position at the closing prices;
 - (c) the amount EUR 500.000 will be exchanged to the Account Currency (crossing through PLN) at the rate published by the Polish National Bank on the day when the aforementioned level was exceeded.
- 10.6. An Open Position on CFD (excluding CFDs based on cryptocurrencies, Stock CFD and ETF CFD) shall be closed by the Company without the Client's consent after 365 days from the date of opening the position, at the first Financial Instrument Price provided by the Company after that period, unless:

- 10.9. The value of Swap Points/Overnight Financing which shall be credited or debited to the Client's Account shall be calculated as the result of the number of Lots opened by the Client and Swap Points/Overnight Financing rates for a particular Financial Instrument.
- 10.10. Swap Points/Overnight Financing rates and rollover dates are specified in the Condition Tables. Swap Points/Overnight Financing rates shall be determined by the Company, for CFDs on the basis of exchange rates and Stock CFDs on the basis of market interest rates for deposits and loans on the Interbank Market. In the case of rollover - additionally on the basis of the base value calculated as the difference between the value of the underlying futures contract with the longer expiration date and the respective value of the Financial Instrument with the shorter expiration date as at the moment of rollover. For CFDs based on cryptocurrencies, the value of Swap Points/Overnight Financing represents the cost of storing a position for the following day and depends on:
- market conditions such as the interest rate of the base currency of the Financial Instrument,
 - ease of entering into a hedging transaction,
 - liquidity of the Underlying Instrument,
 - transactional costs on the Underlying Instrument,
 - market level of Swap Points/Overnight Financing for those Financial Instruments.

The Company adds its margin to the resulting values of Swap Points/Overnight Financing and present the final values in the Condition Tables.

- 10.11. Swap Points/Overnight Financing constitute crediting and debiting of the Client's account, which may arise from the following factors: the interest rates of a given currency on the Interbank Market, the differences in interest rates on two currency pairs on the Interbank Market or the cost of financing an Open Position related to using leverage. The Company may use Swap points to calculate the dividend in accordance with 10.14.

- 10.20. In some cases, Underlying Instruments for Client's short position in Stock CFDs or ETF CFDs may be recalled by the lending counterparty. In such cases the Company will have to close Client's short position in Stock CFDs or ETF CFDs, in order to close the short position that the Company may itself have with any counterparty. Such cases may occur if the exchange short selling rules change or a financial authority applies special conditions for short selling, lending counterparty will withdraw the possibility of short selling on a given Underlying Instrument or

The aforementioned costs shall be collected from a Client at the end of Trading Day and shown in Trading Account as Swap Points/Overnight Financing and may significantly influence the costs charged for a short position on, Stock CFDs or ETF CFDs. The cost is taken into account when calculating the Swap Points/Overnight Financing value of the Financial Instrument. The cost will be indicated in the Condition Tables; however, it may be changed with immediate effect depending on the borrowing costs of the Underlying Instrument.

However, we reserve the right that in some cases the process may require several transactions (which may include, among other things, exchanges between different Crypto-assets and transactions spread over time), in particular due to technical limitations, the lack of a direct exchange method for Bitcoin, or the available liquidity at Liquidity Providers.

In case the error is a result of circumstances for which the Company is liable, the Company shall be liable for damages of the Client limited to the amount of 10% of the Margin value which constituted the collateral of Transaction concluded by the Client on the erroneous price. No provision of the GTC shall limit the liability of the Company towards the Clients for damages caused by the Company's wilful misconduct or fraud.
